About me

Principle for me is: **Less is More** I see possibilities when others see impossibilities.

I was born in 1974 with Brutons, others in the family died because they did not understand that the GENE error affected (i.e. the immunodeficiency)

Grew up with 2 half-Japanese families.

Married a Swedish person and lived together in a villa on Gällstaö, Ekerö.

Suddenly I woke up in the emergency room in Solna, Stockholm. When I was discharged I became a retired.

The result of the hospital stay is that my head became sharper but my body became weaker.

Later the couple went their separate ways (by divorcing and selling the villa).

As a person I enjoy doing something that others see as impossible to do.

Now I live with my parents in Trångsund, Huddinge and have become a day trader (suits me)

In the past I have experience from work 25+ years within the field of IT-security/Operational Risk/Cybersecurity and from working in multiple ooriginations. Experience has shown I should consider trust first! It is import to me, and it should be to you. For instance, if trust is lost, it takes time and effort to restore. It's important to care and to manage your risks. Unmanaged risks may have a negative impact on trust. I can help you with creating to initial visibility and make your organization more successful. "The one you can trust!"

My personal goals are

Is to regain the body and ignore others telling me about risks that can be realized.

To help myself first and to help others later.

To be Social again and be the leader (the one who goes first)

My primary drivers are

- I do it until its done (fail fast) - Deliver a solution only
- I like for others to move forward
- Sustain and protect trust from external partners (customers etc.), staff and owners
- Create visibility (typically trough KPIs) so others can understand

Key professional experiences

- During fall of 2021 I was rushed to a medical care unit - When I was discharged and I was retired by the doctor.
- 2020 was the year I decided to contribute to Covid and decided to help a local restaurant deliver lunchboxes. One day during summer, the phone rang and I was offered an assignment in security again. I said yes, and don't regret I did. I stayed at Addtech about a year.
- Before that I was the CISO at Euroclear Sweden AB (Jun/2019 - Dec/2020)
- And before Euroclear I was at Nordea (Sep/2016 – Jun/2019)
- Then I was a CICO at SSAB (Sep/2011 – Aug/2016)
- Way back I had various positions and assignments
